# Newborn

Screening

#### 

Newborn screening is a simple blood test that helps protect your newborn baby from possible, serious health complications which are treatable, if detected early.

#### 

1<sup>st</sup> trimester of pregnancy weeks).

A blood test +

The reassurance from using reliable, proven DELFIA® chemistry

After 2 days till 28 days of birth.

### 

A few drops of blood collected by pricking the baby's heel on a special filter paper.
